

Science, Technology, Engineering & Math

Throughout our 5 week program we will provide your child with fun and an enriching STEM Program. We strive to mold the engineers of the future using familiar LEGO blocks. Each lesson will begin with a principle of physics, math or mechanical engineering. Through experiments and stories, we will implement the principle using original and motorized LEGO Bricks models.

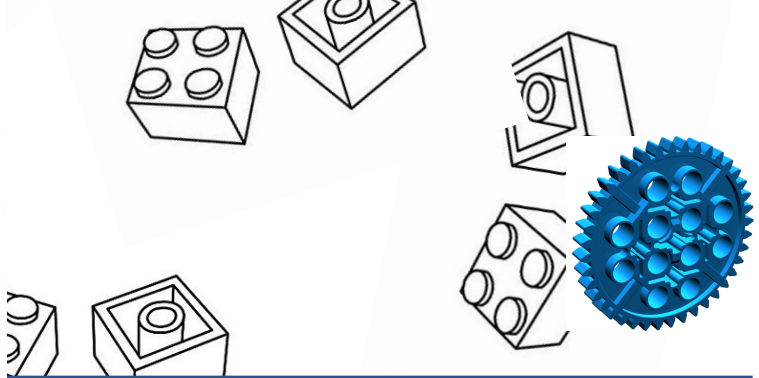

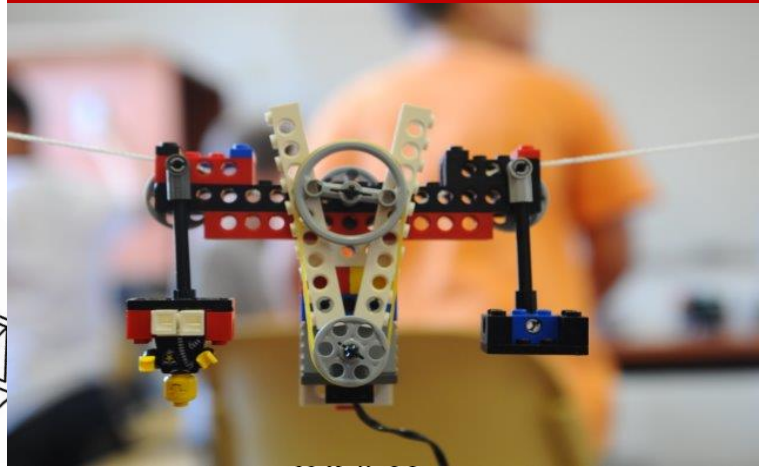

Young Engineers Brisbane North

Aspley Young Engineers LEGO® Bricks Challenge 5 week program

Wed 3:30 – 5:00pm
Start :26th April
Library

\$95
