

Chess Club

Once upon a time, Aspley State School acquired a set of big chess pieces but they didn't have a purpose. The school then endeavoured on a journey to achieve 'checkmate'. A chess club was founded by Miss Oliver which encouraged young players to fulfil their dreams of playing chess at school. Meanwhile, our gigantic set of big chess pieces remained under a building collecting dust.

One day Miss Oliver, discovered the gift and decided it needed a home so she sent her students out to find the perfect place. Two of the suggestions for places were under A Block and in the Year One eating area. After much investigating, finally a spot was found, under E block. Measurements were made and a proposal was taken to Mrs Griffith-Baker. She accepted and the challenge began. The tape was put down and black squares were painted at the working bee. Then the tape was taken off and relaid so that the black squares could be painted. And now finally our chess journey is complete and we are on our way to chess victory!
