

The mysterious monster:

The last Chapter

As the monster came nearer I held onto my life (as I said in the first chapter) "Please, please, please don't eat me". But it didn't listen so I fearfully got my weapon of choice A bucket! Well yes, that's my weapon of choice. But unfortunately the bucket didn't work then the monster swallowed me whole in one big gulp! I went through the tunnel. Is this really happening I thought, I thought this only happens in movies, but in the inside there was a food buffet and a tv! I then realised the monster was actually my protector but a creepy one that's why he's been behind the curtain ever since I was a baby (I am now) so he's been there for 9 years now. He's been protecting me from evil slime ninjas so I thank him but I still don't know why he swallowed me.
